

□ *Please be welcomed to your own event!*

Our stable stand-up scissor folding table "Bistro" will stand you and your guests in good stead. It masters uneven floors without any problems thanks to its four balancing screws.

Its weight of ca. 20 kg and its integrated anti-folding mechanism guarantee absolute stability.

In your warehouse it is a real space-saver: folded down, Bistro is a mere 7 cm in depth.

It can be set up and taken down with just one left movement.

It makes no difference whether you are celebrating indoors or outdoors: Even a shower of rain is merely a game to Bistro.

The frame is available in all colours – powder-coated and thus resistant against scratches and bumps.

Folded down, BISTRO is a mere 7 cm in depth

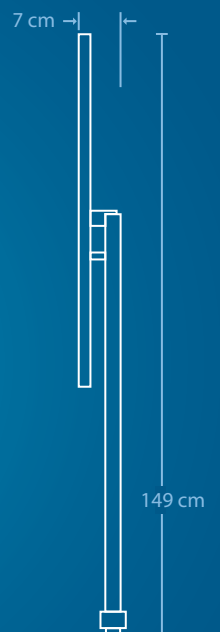

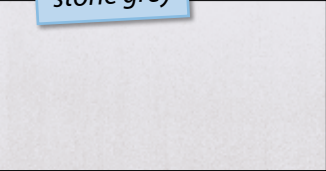

Table Tops of different materials

stone grey
